

Course Outline
Physics 102 (Section 009)
Fall 2018

WF 1-2:20 CKB 106

Dr. George Georgiou
207 Microelectronics (in bridge between ECE and FMH)
georgiou@njit.edu (preferred contact method)
908 596 5690 (office)

Office Hours: W 2:30-4 or by arrangement (send e-mail)

Pre- and Co-requisite Courses

Prerequisite: Satisfactory completion of two high school mathematics courses and two high school science courses.

Laboratory - Physics 102A

The laboratory component of the course is Phys 102A. This laboratory course may be optional for your major; confirm it with your department. If it is required for your major, it must be taken concurrently unless you have previously taken and passed Phys 102A. The grading for the laboratory is separate from the course/recitation (Phys 102) and the grades are given by the laboratory instructors. Latest edition of **Lab manual “Physics 102A Laboratory Manual”** can be purchased from NJIT Bookstore.

YOU MUST REGISTER FOR THE LECTURE/RECITATION (Phys 102) AND THE LABORATORY COURSE (Phys 102A) SEPARATELY. WITHDRAWAL FROM ANY OF THESE WILL CAUSE A SIMULTANEOUS WITHDRAWAL FROM ALL Phys 102 COURSES.

Course Materials

Textbook:

Physics - Principles with Applications, 7th ed. by Giancoli (Publisher: Pearson)

Mastering Physics Online Homework System:

Be sure that your textbook is sold bundled with a Mastering Physics student access code card. You can also buy the student access code card separately either from NJIT bookstore or online. Homework assignments will be posted on-line. Students login, download and solve the assigned problems, and submit answers to the automated grading system. Instruction can be found on the student access code card. **To enroll for this section of the course, use course ID “MPGEORGIU102009F18”.**

I will NOT USE iClickers.

An in-class quiz (~2 workout problems) will be periodically used to monitor class understanding and to take attendance.

Email:

NJIT email will be routinely used for announcements and to distribute material. Be sure check the NJIT email every day.

Attendance

Attendance at lectures and recitations is mandatory; it may constitute a portion of the final grade. Missing more than three lectures will be reported to the Dean of Freshman Studies throughout the semester and can result in failing the course. Students with absences need to discuss their extenuating circumstances for missing the classes with the Dean.

Exams

There will be three Common Exams and a Final Exam during the term. The exam schedule is:

Common Exam 1: Wednesday, October 3, 4:15 – 5:45 pm

Common Exam 2: Wednesday, October 31, 4:15 – 5:45 pm

Common Exam 3: Wednesday, December 5, 4:15 – 5:45 pm

Final Exam: To be announced

There will be no makeup exams.

Grading

Final grades will be based on a composite score for the term's work that includes three common exams, the final exam, homework score, written lecture quiz, **in-class quiz, and class participation**. The approximate weights we expect to use in calculating the composite score are:

- 48 % for three Common Exams (16% for each)
- 33 % for Final Exam
- 12 % for Homework grade
- 7 % **in-class quiz +** Lecture Quiz + **Class participation**

Extra credit may be given for active class participation, etc. Negative credit may be applied for lateness, creating noise, or otherwise interfering with class work.

The cutoff percentages for various letter grades will be in the range of 84.0% for A, 76.0 % for B+, 68.0% for B, 60.0% for C+, 52.0% for C, 44.0% for D, F below 44.0 %.

C or better grade is required to take further physics courses. If you get D in Physics 102, you cannot take the next level physics course.

Reading Assignments

The text readings are listed below. You should read the assigned sections of the text before the lecture covering that material.

Homework

It is impossible to succeed in this course without working a lot of problems: do the homework. Each student must download the weekly homework assignments from Mastering Physics online homework system, work the problems, and submit the solutions online before each assignment is due. Late work will not be accepted. See Course Materials section above.

Honor Code Violations or Disruptive Behavior

NJIT has a zero-tolerance policy for cheating of any kind and for student behavior that disrupts learning by others. Incidents will be immediately reported to the Dean of Students. The penalties for violations range from a minimum of failure in the course with disciplinary probation up to expulsion from NJIT. Avoid situations where your own behavior could be misinterpreted, even if it is honorable. Students are required to agree to the NJIT Honor Code on each exam. Turn off all cellular phones, wireless devices, computers, and messaging devices of all kinds during exams. Please do not create noise in class that interferes with the work of students or instructors.

Help

Students are encouraged to meet with their instructor during their office hours. Physics Department also offers tutoring as posted on <http://physics.njit.edu/>, for which students do not need to sign up but just can go to open sessions provided in the schedule.

Learning Outcomes:

For this course, you can expect to be assessed on the following learning outcomes:

1. Recall the definitions and relationships involving position, velocity, speed, acceleration, vectors, Newton's Laws, circular motion, free-body diagrams, friction, work, energy, linear and angular momentum, torque, angular velocity and acceleration, and gravitation.
2. Apply the equations governing 1-D and 2-D constant acceleration to mechanical systems for various initial conditions. Calculate unknown quantities based on physical relationships, initial conditions, and known quantities.
3. Comprehend the meaning of the equations governing net force and acceleration (Newton's Laws), and be able to manipulate them in conjunction with a free-body diagram to obtain any desired quantitative relationship. Understand the extension of these equations to rotational motion, and gravitation.
4. Generalize the concepts underlying the equations of motion, such as work, kinetic and potential energy, conservation of energy, and equilibrium.
5. Comprehend the meaning of equations governing momentum, impulse, and collisions. Apply the equations governing momentum, impulse, and collisions mechanical systems for various initial conditions. Understand under what conditions momentum is conserved and how to use this relation to calculate unknown quantities based on physical relationships, initial conditions, and known quantities.
6. Understand the extension of linear motion equations to rotational motion. Comprehend the meaning of the equations governing rotational motion and acceleration, and be able to manipulate them in conjunction with a free-body diagram to obtain any desired quantitative relationship.

2018 Fall Course Schedule for Phys 102-009

Dates	Lecture Topics	Text Reading
9/5 W and 9/7 F	Introduction Measurement and Units	Ch 1, Sec 1-6
9/12 W and 9/14 F	Motion in One Dimension	Ch 2, Sec 1-8
9/19 W, 9/21 F, 9/26 W	Vectors and Two-Dimensional Motion	Ch 3, Sec 1-6
9/28 F and 10/3 W	The Laws of Motion - Forces and Newton's Laws	Ch 4, Sec 1-5
10/3 W	Common Exam 1 (4:15-5:45pm)	Ch. 1 - Ch.3
10/5 F, 10/10 W	The Laws of Motion - Applications of Newton's Laws	Ch 4, Sec 6-8
10/12 F	Circular motion	Ch. 5, Sec. 1-4
10/17 W, 10/19 F	Energy -Work, Kinetic Energy, Work-Energy Theorem	Ch. 6, Sec. 1, 3
10/24 W, 10/26 F	Energy -Potential Energy, Mechanical Energy, Energy conservation, Power	Ch. 6, Sec. 4-7, 9, 10
10/31 W, 11/2 F	Momentum and Collisions -Momentum, Impulse, Conservation of Momentum	Ch. 7, Sec. 1-3
10/31 W	Common Exam 2 (4:15-5:45pm)	Ch. 4, Ch. 5.1-5.4, Ch.6.1-6.3
11/7 W	Momentum and Collisions -Collisions	Ch 7, Sec. 4-8, 10
11/9 F, 11/14 W	Rotational Motion, Rotational Dynamics I	Ch 8, Sec 1-3
11/16 F, 11/21 W (F schedule) , 11/28 W	Rotational dynamics II	Ch.8, Sec. 4-8
11/30 F, 12/5	Static Equilibrium	Ch. 9, Sec. 1-4
12/5 W	Common Exam 3 (4:15-5:45pm)	Ch. 6.4-6.10, Ch. 7, Ch. 8
12/7 F, 12/12 W	The Law of Gravity	Ch 5, Sec. 5-8
Date to be announced	Final Exam (week of Dec. 15-21)	Everything learned in class

*** The professor will discuss changes to the syllabus during class if they arise.**

Fall 2018 Academic Calendar

September	4	Tuesday	First Day of Classes
September	10	Monday	Last Day to Add/Drop a Class Last Day for 100% Refund, Full or Partial Withdrawal
September	17	Monday	Last Day for 90% Refund, Full or Partial Withdrawal - No Refund for Partial Withdrawal after
October	1	Monday	Last Day for 50% Refund, Full Withdrawal
October	22	Monday	Last Day for 25% Refund, Full Withdrawal
November	12	Monday	Last Day to Withdraw
November	20	Tuesday	Thursday Classes Meet
November	21	Wednesday	Friday Classes Meet
November	22-25	Thurs-Sun	Thanksgiving Recess
December	12	Wednesday	Last Day of Classes
December	13-14	Thurs-Fri	Reading Days
December	15-21	Sat-Fri	Final Exams Week
