Grade

Your final grade will be based upon four examinations (20% each) and one Final Examination (20%).
The examinations will be administered on the following dates.
First Examination  Thursday, January 28, 2016
Second Examination Thursday, March 03, 2016
Third Examination  Thursday, March 31, 2016
Fourth Examination  Thursday, April 21, 2016
Final Examination  to be announced

If you miss an examination, you will receive a grade of zero that will be calculated into your final
grade. There are no make-up examinations. The following table will determine your final grade.

The examination grades will not be curved, nor will the final grades be curved. Each examination will
consist of multiple-choice and/or true-false questions, all of which will come directly from topics discussed
in class and/or topics discussed in the textbook. The Final Examination will consist of multiple-choice
and/or true-false questions covering the entire course’s material. Each examination will be closed book and
closed notes. No formula sheet or cheat sheet will be provided, nor will either be permitted for any of the
examinations.

The Earth in Space (Phys 203) and The Earth in Space Laboratory (Phys 203A) are two separate
courses for which you will receive two separate and independently-determined grades. Moreover, you are
free to be registered for either one of these courses without being registered for the other course. If you are
registered for both courses, withdrawal from one course does not mean you must withdraw from the other
course.
