

Physics 102 SPRING2018 Course Syllabus

General Physics

Instructor:

Prof. George Georgiou
207 Microelectronics (in bridge between ECE and FMH)
973-596-5690 (office)
georgiou@njit.edu (preferred contact method)

Lecture and recitation for **Sections 004 and 006:**

Section 004: M 10-11:25 (KUPF 105), W 11:30 – 12:55 (Tier 108)
Section 006: M 10-11:25 (KUPF 105), F 2:30 – 3:55 (Tier 107)

Office Hours: Monday 11:30-1, W 1-2:30, F 1-2:15 or by arrangement

Pre-requisites and Co-requisites:

- Satisfactory completion of two high school mathematics courses.
- This sections are NOT for students from the College of Architecture and Design.

Physics 102A Laboratory:

This laboratory course may be optional for your major; confirm it with your department. If it is required for your major, it must be taken concurrently unless you have previously taken and passed Phys 102A. The grading for the laboratory is separate from the course/recitation (Phys 102) and the grades are given by the laboratory instructors. Latest edition of **Lab manual "Physics 102A Laboratory Manual"** can be purchased from NJIT Bookstore.

YOU MUST REGISTER FOR THE LECTURE/RECITATION (Phys 102) AND THE LABORATORY COURSE (Phys 102A) SEPARATELY. WITHDRAWAL FROM ANY OF THESE WILL CAUSE A SIMULTANEOUS WITHDRAWAL FROM ALL Phys 102 COURSES.

Course Materials for Physics 102:

- **Primary text :**
"Physics: Principles with Applications, 7th edition" by Douglas C. Giancoli, Prentice Hall,
ISBN-13: 978-0-321-62592-2
Paper copy is available. An electronic copy can also be purchased or rented.
This textbook contains both Physics 102 and Physics 103
- **Mastering Physics Online Homework System:**
Be sure that your textbook is sold bundled with a Mastering Physics student access code card. You can also buy the student access code card separately either from NJIT bookstore or online (masteringphysics.com). Homework assignments will be posted on-line. Students login, download and solve the assigned problems, and submit answers to the automated grading system. Instruction can be found on the student access code card.
To enroll for Section 004, use course ID "MPGEORGIU102004S18"
To enroll for Section 006, use course ID "MPGEORGIU102006S18"

Attendance:

Attendance at lectures and recitations is mandatory; it may constitute a portion of the final grade. Missing more than three lectures will be reported to the Dean of Freshman Studies throughout the semester and can result in failing the course. Students with absences need to discuss their extenuating circumstances for missing the classes with the Dean.

Examinations: There will be three exams and a comprehensive Final Exam during the term. The exam schedule is:

- **Common Exam 1:** Wednesday, February 21 4:15 – 5:45 PM
- **Common Exam 2:** Wednesday, March 21 4:15 – 5:45 PM
- **Common Exam 3:** Wednesday, April 25 4:15 – 5:45 PM
- **Final Exam** to be announced

In-class quizzes covering the preceding or current work will be given during lectures. The grades count toward your final course grade. There will be no make-up quizzes and normally no make-up common exams.

Classroom Response System:

I will NOT use “iClicker”. Periodic In-Class quiz (part of your grade) will be used for attendance. They are also part of your grade.

Homework: It is almost impossible to succeed in physics courses without working a lot of problems. Do the homework. **Remember that homework is 11% of your final grade.**

- **“Mastering Physics” is used for homework.** Students must enroll in the course specified by his/her instructor. Homework is posted on-line. Students login, download and solve the assigned problems, and submit answers to the automated grading system. **Late work will not be accepted.** Mastering Physics has additional help tools.

To enroll for Section 004, use course ID “MPGEORGI0U102004S18”

To enroll for Section 006, use course ID “MPGEORGI0U102006S18”

Final Grades will be based on a **composite score** for the term’s work that includes each common exam score, the final exam, in-class quizzes, and the term’s homework score. Here are the approximate weights to be used for calculating the composite score:

- **48% -- Exam 1+2+3 (16% each)**
- **32% -- Final Exam**
- **12% -- Homework**
- **8% -- Lecture Quizzes**

Letter grades will be assigned as follows:

A >84% B+ - 76%-83% B - 68%-75% C+ -60%-67% C - 52%-59% D - 44%-51% F < 44%

Help: Students are encouraged to meet with their instructor during their office hours or by arrangement.

Physics Department also offers tutoring as posted on <http://physics.njit.edu/students/>.

Honor Code Violations or Disruptive Behavior: NJIT has a zero-tolerance policy for cheating of any kind and for student behavior that disrupts learning by others. Violations will be reported to the Dean of Students. The penalties range from a minimum of failure in the course plus disciplinary probation up to expulsion from NJIT. Avoid situations where your own behavior could be misinterpreted as dishonorable. **Students are required to agree to the NJIT Honor Code on each exam.** Turn off all cellular phones during classes and exams.

Learning Outcomes: For this course, you can expect to be assessed on the following learning outcomes:

1. Definitions and relationships involving position, velocity, speed, acceleration, vectors, Newton’s Laws, circular motion, **free-body diagrams**, friction, work, energy, linear and angular momentum, torque, angular velocity and acceleration, and gravitation.
2. Apply the equations governing 1-D and 2-D constant acceleration to mechanical systems for various initial conditions. Calculate unknown quantities based on physical relationships, initial conditions, and known quantities.
3. Comprehend the meaning of the equations governing net force and acceleration (Newton’s Laws), and be able to manipulate them in conjunction with a free-body diagram to obtain any desired quantitative relationship. Understand the extension of these equations to rotational motion, and gravitation.
4. Generalize concepts underlying the motion (work, kinetic / potential energy, energy conservation equilibrium ...)

5. Understand equations governing momentum, impulse, and collisions. Apply these equations to mechanical systems for various initial conditions. Understand under what conditions momentum is conserved and how to use this relation to calculate unknown quantities based on physical relationships, initial conditions, and known quantities.
6. Understand the extension of linear motion equations to rotational motion. Comprehend the meaning of the equations governing rotational motion and acceleration, and be able to manipulate them in conjunction with a free-body diagram

2018 Spring Course Schedule for Phys 102-002

Dates	Lecture Topics	Text Reading
1/ 17 W, 1/19 F	Introduction Measurement and Units	Ch 1, Sec 1-6
M 1/22 1/24 W or 1/26 F	Motion in One Dimension	Ch 2, Sec 1-8
M 1/29 1/31 W or 2/02 F	Vectors and Two-Dimensional Motion	Ch 3, Sec 1-6
M 2/5 2/07 W or 2/09 F	The Laws of Motion - Forces and Newton's Laws	Ch 4, Sec 1-5
M 2/12 2/14 W or 2/16 F	The Laws of Motion - Applications of Newton's Laws	Ch 4, Sec 6-8
M 2/19 2/21 W or 2/23 F	Circular Motion	Ch. 5, Sec. 1-4
Common exam 1 W 2/21 4:15 – 5:45		Ch. 1,2,3,4
M 2/26 2/28 W or 3/02 F	Energy -Work, Kinetic Energy, Work-Energy Theorem	Ch. 6, Sec. 1- 3
M 3/5 3/07 W or 3/09 F	Energy -Potential Energy, Mechanical Energy, Energy Conservation, Power	Ch. 6, Sec. 4-7, 9, 10
March 11 – 18 SPRING BREAK		
M 3/19 3/21 W or 3/23 F	Momentum and Collisions -Momentum, Impulse, Conservation of Momentum	Ch. 7, Sec. 1-3
Common exam 2 W 3/21 4:15 – 5:45		Ch. 5, 6
M 3/26 3/28 W (section 4)	Momentum and Collisions -Collisions	Ch 7, Sec. 4-8, 10
FRIDAY 3/30 NO CLASS		
M 4/2 4/04 W or 4/06 F	Rotational Motion, Rotational Dynamics I	Ch 8, Sec 1-3
M 4/9 4/11 W or 4/13 F	Rotational Dynamics II	Ch.8, Sec. 4-8
M 4/16 4/18 W or 4/20 F	Static Equilibrium	Ch. 9, Sec. 1-4
M 4/23 4/25 W or 4/27 F	Gravitation	Ch 5, Sec. 5-8
Common exam 3 W 3/21 4:15 – 5:45		Ch. 7,8
T 5/1 (Friday Schedule)	Review	
May4-10	Final Exam	Everything

*** The professor will discuss changes to the syllabus during class if they arise. NJIT email will be routinely used for announcements and to distribute material. Be sure check the NJIT email every day.**

IMPORTANT DATES;

January 16 Tuesday First Day of Classes
January 22 Monday Last day to Add / Drop Class. Last day to Withdraw with 100% Refund
March 11-18 Sun-Sun SPRING RECESS – NO CLASSES (University Open)
March 30 Friday Good Friday – NO CLASSES (University Closed)
April 2 Monday Last day for Withdrawal
May 1 Tuesday Last Day of Class, Friday Classes Meet
May 2-3 Wed. – Thurs. Reading Days
May 4-10 Fri. – Thurs. FINAL EXAM Period
May 12 Saturday Final Grades Due.

Common Exams

PHYS 102

Wednesday 4:15–5:45 – 2/21 /18, 3/ 21/18, 4/25/18
